

# EKKO AKWAFIL 026 BEAM

**SPEC** SHEET

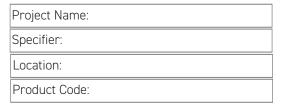

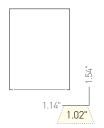

PH: 262.505.5124

FX: 262.753.6582

DIRECT	AKWA Resin Encapsulation							
LED lumens/m (L/f)	500 (152)	1000 (300)	1500 (455)	2250 (682)				
Delivered Lumens/m (L/f)	265 (80)	530 (160)	795 (241)	1193 (362)				
Standard CRI	>80							
System W/m (W/f)								
2700K	4 (1.2)	8 (2.4)	8 (2.4) 13 (3.9)					
3000K	4 (1.2)	12.5 (3.8)	3) 21.7 (6.6)					
3500K	4 (1.2)	7.6 (2.3)	12 (3.6)	20 (6.1)				
4000K	4 (1.2)	7.7 (2.3)	12 (3.6)	19.6 (5.9)				
Other LED Options	RGBW (adds 15w/m to above wattage chart)							
Control (Remote) <sup>4</sup>	non dim · DALI · 0-10V · DMX (RGBW only) <sup>3</sup>							
Optics	AKWA- symmetrical							
Finish	white/black/silver powder coat standard · custom powder coat · clear anodized							
Weight/Pack Size	1.2kg/m - 70 x 70 x (l + 200mm)							
Mounting	wire suspended · rod suspended · surface mount bracket · wall mount bracket							
Accessories	mitred bends · T-joins							
Luminaire Length	any length over 500mm in 1mm increments with fully illuminated diffuser; fixture length exceeding 9' requires seamless join.							

Lumens/m based on 4000K LED strip.
Due to tolerances of the production process and the electrical components, values for light output, colour temperature and electrical power can vary up to 10%

### INSTRUCTION SHEET: DMX CONNECTION

All KLIK DMX controlled linear products are supplied with Cat5/6 cables supporting DMX transmission. Each fitting is supplied with a labelled DMX IN and DMX OUT (if required) RJ45 Socketed cable.

The pinouts are wired as per Table 4 Section 7.3 of E1.11 – 2008, USITT DMX 512-A. (TABLE 1)

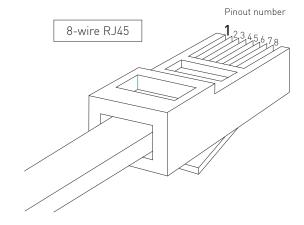

### TABLE 1

(Wire) #	DMX512 Function	T568B Wire Colour	T568A Wire Colour			
1	Data 1 +	White/ Orange	White/ Green			
2	Data 1 -	Orange	Green Pin			
3	Data 2 + (Not utilised)	White/ Green	White/ Orange			
4	Data 2 - (Not utilised)	Blue	Blue			
5	Not assigned	White/ Blue	White/ Blue			
6	Not assigned	Green	Orange			
7	Data Link Common	White/ Brown	White/ Brown			
8	Data Link Common	Brown	Brown			
	Drain					

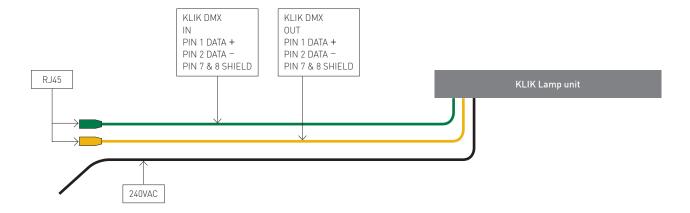

## Klik fittings are configured internally or in a remote box as follows:

- All DMX controllers are supplied with optically isolated receivers.
- Multiple DMX controllers (Nodes) are wired internally as a daisy chain. Each node has a 1 in, 2 out splitter. KLIK DMX nodes do not need to be terminated with a 120Ω resistor.
- These Nodes may been wired internally with CAT 5 cable or a 3 core cable. Internal DMX wiring of KLIK fittings are propriety and may not conform to Table 4 Section 7.3 of E1.11 2008, USITT DMX 512-A. Any alteration to internal DMX wiring is not covered by KLIK warranty. It is suggested that if any modifications are to be made that a KLIK technician be contacted first.
- Unless otherwise specified all Nodes are factory set to DMX start channel 1. To alter the start address of a Node, physical access to the Node is required. The Node also requires a supply voltage to re-address the DMX controller. DMX-RDM is not supported in standard KLIK fittings.
- If multiple addresses are KLIK factory set, then these addresses will be labelled on the Node and on the fitting. Note: It is not necessary to daisy chain addressed fixtures in numerical order.
- KLIK DMX Nodes are designed to be daisy chained across multiple KLIK fittings without the need for external DMX Splitters.
- KLIK DMX fittings should never be wired in a star topology. Fittings shall be daisy chained connecting DMX OUT labelled cables to the next DMX IN labelled cable. If a star type topology is required then a DMX Splitter shall be used.
- Any external DMX wiring (CAT5/6) installed by the contractor shall be segregated and cross other power lines at a 90° angle.
- On KLIK suspended products the length of the Cat5/6 cables (IN/OUT) will be the same as the power feeds and will be grey.
- No other data or power is to be connected to the DMX IN or DMX OUT connections.
